The growth of popularity

is the best test of satisfaction, and it is by the certain test of time that Edmonds has progressed so remarkably. Surely there could be no better testimony to the exceptional value of Edmonds Baking Powder than the fact that its sales last year were over 1,250,000 tins. Think of it—a million and a quarter tins—over six tins sold on an average to every family in the Dominion. Why and how has Edmonds grown so wonderfully? Why is it still growing? The answer is two words—Quality, Value. If you are one of the few housewives using some other baking powder, try one tin of Edmonds—you'll never want to go back to another brand.
